

Look:

Set in a beautiful garden in Jimbaran, part of a unique boutique hotel complex, Henna Spa is a haven of style. Moroccan themed treatment rooms are reached through ornately tiled corridors. Luxury fabrics, lighting fixtures and atmospheric music complete the scene. A serene hideaway that is also a showcase for stylish design and furnishings.

Feel:

The menu offers a range of holistic treatments from a wonderful traditional Indonesian massage to ayurvedic treatments, hot stone massage and traditional Indonesian beauty treatments. Packages feature local scrubs like lulur and boreh, followed by the massage of your choice. Foot baths and cream baths complete the list of indulgent treatments.

Ingredients:

Tailored massage blends offer a choice of refreshing, soothing or energizing aromatic oils to suit the mood. Simply luxurious is the approach taken with all their spa products; local, natural and delicious.

Magic:

The spa itself is a magical place, filled with decorative details and fabulous design elements. The prices are reasonable for this level of luxury. The couples room features a wonderful open bathroom and a private terrace. The atmosphere is one filled with opulent features in burnished gold and silver, bronzes and maroons and it is sparkling to the last detail.
